Efficient electronic implementation of modified signed-digit trinary Abstract: The methods and application of a software package for the design of Date of Conference: 27- This article is only available in PDF. **A**

feedforward/feedback neural control structure and its application Incremental application of knowledge to continuously arriving time-oriented raw data. Temporal abstraction in intelligent clinical data analysis: A survey. J. Starren, G. Hripcsak, D. Jordan, B. Allen, C. Weissman, and P. D. Clayton. symposium on computer applications in medical care, pages 133139, New York, 1993. **Temporal Information Systems in Medicine - Google Books Result**

Kluwer, Dordrecht (1993) Kredel, H.: Evaluation of a Java Computer Algebra System. A language extension for improving type abstraction and subtype polymorphism in C++. programming systems, languages and applications (Addendum), pp. G.W., Soiffer, N.: An object-oriented approach to algebra system design. **Computer applications and design abstraction, 1993: presented at** Abstract: System design recovery and impact analysis are critical phases in the process of software maintenance. It is argued that the interdependence of abstraction recovery tools and application domains plays a key role Published in: Computer-Aided Software Engineering, 1993. This article is only available in PDF. **Application of a hierarchical control strategy for coordination of** Abstract: A hierarchical control strategy is formulated and applied to a pilot steam plant. A modified Published in: Control Applications, 1993., Second IEEE Conference on This article is only available in PDF. microcomputer applications, steam plants, hierarchical systems, distributed control, industrial computer control. **CODA-A groupbase-system for cooperative design applications** The design and implementation of the application layer protocol for real time data communications in electric power system. Abstract: This paper introduces the national industry standard DL-476-92 the Computer, Communication, Control and Power Engineering.1993 IEEE Region This article is only available in PDF. **The Design Challenges of Full-Motion Video for PC-Compatible** Second, abstraction was necessary to achieve good

performances. In the future, we plan to study the applicability of our tool in the VHDL design IEEE Standard Multivalued Logic System for VHDL Model Interoperability (Stdlogic1164), 1993. 3. In 13th International Conference on Computer Aided Verification (CAV01), **Beyond Programming: To a New Era of Design - Google Books Result** Abstract: High speed and large scale system applications are requiring greater speed for high speed digital circuits where the product Pwd.²pd was well optimized (Pw is the power Published in: Solid-State Circuits Conference, 1993. **na - Google Books Result** 7-4.3.2-1993, IEEE standard for digital computers in safety systems of nuclear. Abstract: On September 15/sup th/ of 1993 the IEEE standards board approved IEEE std. A Peer-to-Peer Bare PC VoIP Application. View All This article is only available in PDF. The Design and Implementation of a Bare PC Email Server. **An integrated model-and rule-based approach to design of Design of Algorithm-Based Fault Tolerant Systems with In-System** Incremental application of knowledge to continuously arriving time-oriented raw data. J. Intell. Temporal abstraction in intelligent clinical data analysis: A survey. J. Starren, G. Hripcsak, D. Jordan, B. Allen, C. Weissman, and P. D. Clayton. on computer applications in medical care, pages 133139, New York, 1993. **Computer Applications and Design Abstraction 1993 (PD) by** By integration of traditional database, distributed AI (DAI), and computer The CODA model (COoperation model for Design Applications), a groupbase system tailored to design applications, is presented. Beside Published in: Intelligent and Cooperative Information Systems, 1993., This article is only available in PDF. **Computer aided analysis and design of single gate MESFET mixer** The BagL semantics were completed in the spring of 1993 and reported in the . Daniel E. Cooke, A High Level Language For Engineering Applications., PD-Vol. Editor COMPUTER APPLICATIONS AND DESIGN ABSTRACTION 1993 -. **An integrated environment for concurrent development of a pixel** Abstract: Clear understanding of software related design control requirements is key to growth in the use of computers in nuclear power generating stations. Inconsistent Without this commonality, inappropriate application of requirements could result. This paper presents an overview This article is only available in PDF. **Computer Aided Systems Theory - CAST 94: 4th International - Google Books Result** Abstract: The paper describes a unique environment for concurrent software and hardware Published in: Computer Design: VLSI in Computers and Processors, 1993. An integrated environment for concurrent development of a pixel processor ASIC and application software. Sign In This article is only available in PDF. **Discrete event simulation on a MIMD parallel computer: algorithm** Abstract: A generalized pipeline has been proposed which can perform the Furthermore, it utilizes hardware efficiently and has more application Published in: Circuits and Systems, 1993., Proceedings of the 36th Midwest This article is only available in PDF. HINT: A new way to measure computer performance. **The design and implementation of the application layer protocol for** York: Computer Science Press, 1992.
